

# Approved Textiles

## | Why do textiles need to be approved?

The simple answer – so your Venue Industries' products will look exactly as you imagined. Not all fabrics are meant to be used in the same ways. Each fabric has a set of individual characteristics, which make it unique and better suited for specific purposes. Material content, weave, strength, stretch, cleaning methods, and finishing methods all influence aspects of the overall aesthetic of your final product. Our approval process guarantees that nothing will slip through the cracks or be overlooked.

The following is a list of our most tried and true fabrics.

## | Testing Fabrics

Not sure if a fabric is a good fit for a product? We'd be happy to test it for you. To test any new fabric, email [sales@venueindustries.com](mailto:sales@venueindustries.com) include the fabric manufacturer, name of the pattern and the Venue Industries product. We'll either let you know if it has been tested before, if not you may send any fabric samples to:  
**3212 N. 40th St. #103B, Tampa, FL 33605**

## | Yardage Requirements

A majority of fabrics of narrower widths, patterns, and directional aspects will most likely require additional yardage. Our yardage requirements are standardized by our use of 54 inch bolts of plain goods materials. All of our fabrics are applied to obtain the best yield, unless otherwise specified.
